WREN Furniture Series | DESIGN PRINCIPLES

Designed by Elliot Rich and commissioned in collaboration with Lend Lease / CfAT (Centre for Appropriate Technology), the WREN series is a simple, adaptable, and playful range of furniture items that help to encourage community engagement in both indoor and outdoor spaces. All of the furniture items are free-standing and can easily be moved for different arrangements. Some items also stack for ease of storage when not in use.

*'Simple, adaptable, and playful range of furniture -
that help to encourage community engagement'*

In terms of materials and processes, the support frames are manufactured from CNC bent stainless steel tube. These universal frames can then be paired with a variety of materials and finishes to provide colour and texture alternatives that are most appropriate to the environment, including: Aluminium, Timber, and Upholstery.

The following presentation outlines the design of the complete Wren furniture series including:
Chair, Low Stool, High Stool, and Tables.
